DETAILED ACTION

Applicant is strongly advised to provide an English translation of DE10163944 as cited in the PTO-1449 dated 10/14/04.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by EP0894954A. A temperature sensor 17 measures the temperature of the engine metal (cylinder) to control the coolant temperature via pump 13, valve 15, and fan 9. In regard to claim 11, the control is deemed to inherently require a temperature subtraction because the temperature of an engine cylinder is far above that of the coolant temperature.

Allowable Subject Matter

Claims 12-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
